

a worktable and a stacking chair in one piece of furniture

awards

**SEATTABLE**<sup>®</sup>  
MODEL ST.L design Ilian Milinov

## why is it different?

Designed and constructed with the greatest attention to detail, SEATABLE's discrete handle on the back ensures an easy transition from seat to table and back again. All it takes is one smooth "flip" action. This simple flip gives you unparalleled flexibility. A complete hall can be rearranged within minutes without having to bring in or out any additional furniture.

## space saving

SEATTABLE's ability to stack onto a light and manoeuvrable matching trolley makes it even easier to completely clear a room, freeing available space when needed. Dedicated storage space for tables and chairs will no longer be a necessity.

## flexibility

SEATTABLE provides for shorter set-up/breakdown times in your facilities. Individual event specifics will determine how many SEATTABLES would be used as seats or tables. You no longer need to bring in or out furniture every time you rearrange a space.

## comfort

SEATTABLE features clear lines with comfortable ergonomic form. The large practical work top and generous seat ensure comfort even over long periods. The frame design enables the chair to fit comfortably close to the table, allowing customization of available workspace.

## quality

Built to the highest standards, SEATTABLE is designed and manufactured with particular attention to detail. Certified to meet ANSI/BIFMA (USA), LGA (Germany) and JIS (Japan) standards, quality and safety are assured.

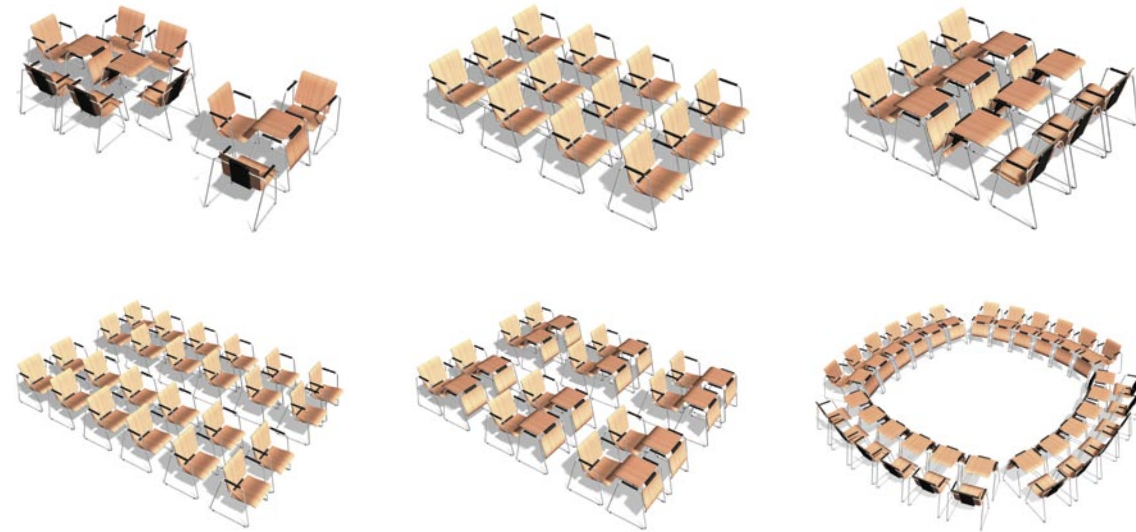

seat or table?  
it's up to you. just make a flip.

MODEL ST.L

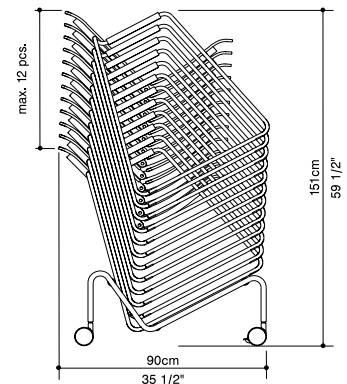

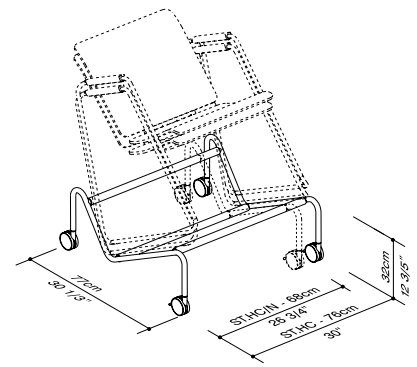

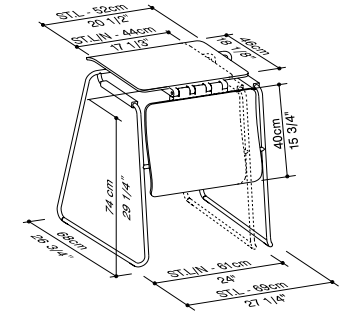

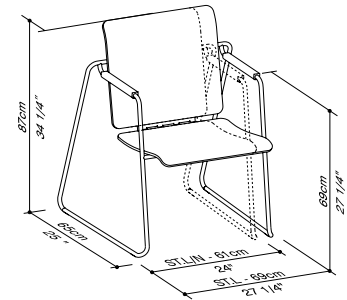

# no limits to change

SEATTABLE is the only solution where 12 work desks and seats can be transformed into auditorium seating for 24 in just one minute. With no need for extra help or bringing in additional furniture. SEATTABLE is available in multiple colors, finishes and upholstery options, so it suits virtually any environment, making life easier. Universities, training centers, conference rooms, institutions, libraries, museums, hotels, hospitals ... it does not matter!
