

# call centre

[www.dams.com](http://www.dams.com)

The structure of an object cannot be regarded detached from a technical, economic, social and cultural context.

Call centre desk tops are manufactured from 25mm board and available in five standard finishes. All MFC (melamine faced chipboard) used, meets BS 476 PT7 class 1 surface spread of flame, as well as E1 European Formaldehyde Emission. Edging used is ABS wood grain, with a thickness of 3mm.

Radial legs are 65mm diameter. Powder coated and finished in Ral 9006.

Cable management can be found in the desk tops in the form of a 65mm radial cable port. Cables can be passed through the spacers at the back of the tower pedestals. The central core has removable doors allowing easy access to data and power cables.

Granite narrow pedestals form part of the overall structure of the call centre ranges. These are available with optional doors in the five standard colours.

Screens are manufactured from 25mm MFC, upholstered with foam and fabric. Please refer to Dams Fabric Swatch.

# 8 person call centre

Call Centre design that's as versatile as  
your imagination.

▲ Narrow pedestals available with or without doors.

▲ Customise to suit any requirements.

3xMMT

## 6 person call centre

Team - working means sharing a big part of your with others. Desk mounted screens help reduce the level of noise, while at the same time creating individual space.

▲ Braked castors.

▲ Cable Management and Telecommunications can be fed to the work surface areas from the central core.

▲ Mobile meeting tables increase your desk top space.

## 3 person call centre

A more positive attitude to work is an added bonus. Designed to maximise the use of walls, we recommend that if choosing support pedestals, you select a 'CPT' pedestal from the Dams Largo range for storage to the 3rd workstation.

▲ Stylish and elegant metal handles.

▲ Choice of colours available. See Dams fabric swatch guide.

▲ Easy access to cabling.
